Memo No. _____

Date / /

10

- i) Transparency - the decision made by AI can be described and reproduced example why loan was given
- ii) Accountability - Taking responsibility of the decision made by AI example loan deferred.
- iii) Privacy - AI models should be able to ensure the user's data is well securely protected example not to reveal user loan history
- iv) Fairness - AI systems should be free from bias. It should give equal loan probabilities to each user not being biased of gender or race.
