

1B

1b)

```
def printer(n):  
    for i in range(n):  
        statements  
    return value.
```

What is its big O complexity and runtime func

$$T(n) = 1 + (n+1) + n + (n+1)$$

$$T(n) = (n + 2n + 3) \approx \text{runtime function}$$

Big O complexity $T(n) = O(n)$
